The Client

Employee Count: 15+

Head Office: Birkenhead, Wirral

Halsalls Solicitors stands as a reputable legal entity renowned for its unwavering dedication to excellence and client-centric ethos. Specialising in a diverse range of legal services spanning residential & commercial conveyancing, private client work, and more, Halsalls boasts a seasoned team of solicitors with a wealth of expertise and a proven track record of success.

Their deep understanding of the legal landscape enables them to deliver tailored solutions that precisely meet the individual needs of each client. With a steadfast commitment to upholding the highest standards of professionalism, integrity, and ethical conduct, Halsalls Solicitors ensures that clients can be assured they will receive exceptional legal representation and guidance.

Our Managed IT Partnership

Since September 2022, razorblue has been a trusted partner of Halsalls Solicitors. With a team of 15+ employees, Halsalls Solicitors needed Managed IT that could meet their cybersecurity needs. Halsalls approached us as their current IT wasn't sufficient for their needs as a growing company.

Choosing razorblue as their managed IT provider, Halsalls Solicitors leveraged our expertise to enhance their infrastructure ensuring operational continuity. Through collaborative efforts and a commitment to excellence, razorblue delivered a comprehensive solution for Halsalls Solicitors.

With a proactive approach we were able to provide them with a range of solutions as part of our Managed IT offering, including cloud servers, end point management, cybersecurity, cloud backup and firewalls, enabling them to focus on delivering exceptional legal services to their clients.

As a trusted partner, razorblue continues to provide ongoing support and strategic guidance to Halsalls Solicitors, ensuring their IT infrastructure remains secure and resilient in the face of evolving cyber threats.

razorblue took a proactive approach to address Halsalls' security challenges. Beginning with an initial security review, vulnerabilities were identified and communicated to stakeholders including the need for additional security outside of Microsoft 365. Collaborating closely with key personnel, razorblue developed a detailed statement of works that aligned with Halsalls' objectives and provided a comprehensive solution to their email security risks.

The implementation of the email security protection was executed smoothly, with minimal disruption to operations. Moreover, beyond email security, razorblue enhanced Halsalls' infrastructure by introducing new servers and Sophos endpoint protection. This holistic approach not only ensured comprehensive security but also contributed to overall resilience.

The Challenge

In addition to providing Halsalls with Managed IT services they also required assistance in fortifying their email security. With a lack of advanced email security measures in place, they were growing increasingly susceptible to spam, sophisticated phishing attacks, and were experiencing a large number of impersonation attempts.

Due to the nature of the business and the high volume of sensitive client data they were handling it was critical they safeguard client information and maintain operational continuity.

As a result, Halsalls set out to fortify their email security framework and as email remained the primary mode of communication within the organisation, ensuring its integrity was imperative. Despite Microsoft having an extremely high level of security, its widespread use means it can be a target for cyber threats and so we proposed the implementation of additional Mimecast Email Security.

razorblue Approach

razorblue took a proactive approach to address Halsalls' security challenges. Beginning with an initial security review, vulnerabilities were identified and communicated to stakeholders including the need for additional security outside of Microsoft 365.

Collaborating closely with key personnel, razorblue developed a detailed statement of works that aligned with Halsalls' objectives and provided a comprehensive solution to their email security risks.

The implementation of the email security protection was executed smoothly, with minimal disruption to operations. Moreover, beyond email security, razorblue enhanced Halsalls' infrastructure by introducing new servers and Sophos endpoint protection. This holistic approach not only ensured comprehensive security but also contributed to overall resilience.

The Outcome

Working closely with Halsalls, razorblue implemented Mimecast to proactively protect against email threats against all users. This solution bolstered email security for all users while ensuring operational efficiency remained intact.

Key components of the solution included configuring the Mimecast tenant, onboarding customer email domains, routing all Microsoft 365 inbound/outbound emails through Mimecast, and licensing Mimecast Security (S1) for all users. Additionally, Mimecast's comprehensive protection encompassed antivirus, antispam, advanced threat detection, data loss prevention, and content examination.
